- Khmer
- English

ABOUT ME

I am a seasoned web engineer in developing and optimizing web applications. My expertise spans the entire development lifecycle, from UI/UX design to full-stack implementation using modern frameworks like Laravel, Next.js, and Nuxt.js. Whether I am architecting complex enterprise systems or optimizing SEO for organic reach, my focus remains on building scalable, user-centric products.

EXPERIENCE

Senior Web Engineer & Team Lead
Marinax PP 2022 - Present

Directing a multidisciplinary team of developers to deliver high-performance enterprise applications. Specializing in system architecture, performance optimization, and mentoring junior talent to maintain architectural integrity.

Web Engineer
Marinax PP 2018 - 2022

Developed and maintained web applications using PHP, Laravel, MySQL, HTML, CSS, and JavaScript. Worked on both frontend and backend development, implemented new features, resolved technical issues, and collaborated with team members to deliver projects based on client requirements.

Web Designer
Net Frontier Cambodia 2015 - 2018

Foundation years focused on mastering PHP ecosystems and responsive web design. Delivered 50+ client projects ranging from landing pages to complex e-commerce platforms.
